KCCP LIMITED
A Government of Kerala Undertaking

ABOUT KCCPL

KCCP Limited is primarily a mining company with activities in Payangadi & Kannapuram in Kannur District and Karindalam & Nileshtar in Kasaragod District. Due to growing environmental concerns, the company ceased major mining operations in February 2015. Following that, the company limited its mining operations in the Kannapuram and Nileshtar units. The company has diversified its activities into a number of sectors, including Information Technology, Fuel Retail Outlets, Integrated Coconut & Fruit Processing, High-tech Coir De-fibering, Aquaculture, Passion Fruit Garden and Sanitizer, Handwash & Floor Cleaner production unit. With a view to utilise its in-house resources, the company is also undertaking land development works for Government & other institutions.

HI TECH DE-FIBERING UNIT

Company has setup hi tech coir de-fibering units at payangadi and Nileshwaram for production of coir fibre from coconut husks. Coir fibre is the base material for other coir products. Each unit is having capacity to process 30,000 husks per day in single shift. Coir pith generated during de-fibering process is converted as pith manure/pith compost. Pith compost is organic in nature and very good for agriculture purpose. Our coir pith manure is marketed in the trade name KCCPL AGRIPITH.

KCCPL

AGRIPITH
ORGANIC SOIL CONDITIONER
FROM COIR PITH

Quantity: 1kg | 2kg
5kg | 10kg | 25kg

BENEFITS OF AGRIPITH

1. Excellent air porosity.

KCCPL AGRIPITH maintains excellent air porosity and gives better crops with faster developing roots and more flowers and fruit per plant when used correctly.

2. Excellent water retention.

Besides having obvious advantages in dry climates, KCCPL AGRIPITH reabsorbs moisture more readily and plants recover more quickly.

3. Suitable for soil remediation

KCCPL AGRIPITH can also be used as mulch for soil remediation by increasing the nutrients status and thereby increasing the fertility of barren land.

4. Environmentally preferable to the alternatives.

KCCPL AGRIPITH is a byproduct of the coir industry. Its use therefore, does not involve the destruction of peat bogs and natural wetland wildlife habitat. It is a renewable resource with no hazardous disposal problems.

KCCP LIMITED is currently one of the Kerala's leading health care and hygiene product manufacturers offering different varieties of hand wash, sanitizer and floor cleaner. Our products are marketed with the trade name KCCPL DION.

KCCPL Dion sanitizer is manufactured in lavender flavour and sold in different quantities.

KCCPL Dion hand wash is available in flavours; Strawberry, Jasmine, Lemon, Herbal and Rose. Our hand wash moisturises and protects hands from dangerous viruses without harming skin. It has a relaxing aromatic scent.

KCCPL Dion Floor cleaner comes in two varieties; Floral Shine and Herbal Splash. KCCPL Dion floor cleaner can kill harmful bacteria and makes your floor shine well.
